William Kelley
ITE315-Assignment 05

```
$ python3 assn05.py
hello world how are you today hello today
{'hello': 2, 'world': 1, 'how': 1, 'are': 1, 'you': 1, 'today': 2}
Enter a month number:
5
      May 2019
Mo Tu We Th Fr Sa Su
       1  2  3  4  5
 6  7  8  9 10 11 12
13 14 15 16 17 18 19
20 21 22 23 24 25 26
27 28 29 30 31

37
```

```
#!/usr/bin/python

# ITE315-Assignment 05
# July 5, 2019

# Problem Number 2 to me is more difficult than problem 4.
# Working on a better implementation
# of it, I just wanted to make sure I got something decent to submit.
