CS/ITE 452 – Capstone
Written Peer (and self) Evaluations

Name: _____**Eric Day**_____   **Date:** ___**2/25/2019**___

Project Name: ___**BioRubeBot**_____

Completed User Stories for this Sprint	Date Completed
n/A	

This lists tasks you were assigned and completed (DONE) during this sprint which were specifically related to the implementation of the project. Examples: Implement and fully test class XYZ. Create main window GUI in Visual Editor of Visual Studio.

Other Action Items completed in this Sprint
Worked heavily with Joshua to get product loaded onto iPad **Assisted teammates with any road blocks.** **Organized teammates.**

This lists other tasks you completed during this Sprint. Examples: Installed version control software on my personal computer. Learned the Ruby programming language for the project. Wrote the Risk Management plan for the Software Development Plan.

Problems encountered (if any):

Problem resolution:

User Stories Assigned for the next Sprint
lead development on fixing bugs from previous levels • Work on transcription regulator transition to new object(transcription regulator 2) • Assisting Joshua with level 3 development

This lists tasks you have been assigned for the next sprint. Note: If an item will take more then one sprint to complete then it is NOT AN ACCEPTABLE USER STORY. Each User Story must be completed in one sprint.
